

## What is RAM<sup>®</sup> Mounts?

- RAM<sup>®</sup> Mounts is a technological pacesetter and catalyst for a wide range of various mounting solutions.
- World's leading supplier of a universal three-component mounting system.
- More than 6,000 robust modules that can be easily and flexibly be exchanged or supplemented with other RAM<sup>®</sup> Mounts components.
- Extremely sturdy and ready for immediate use even in challenging mounting situations thanks to fast and intuitive installation.
- Cooperations with renowned manufactures of electronic devices.

## The 3- Components RAM<sup>®</sup> Mounts System

## Advantages:

### High-Quality Design & Materials

- Ready for immediate use thanks to exclusive, patented design.
- Meets highest industry standards, selected products with aviation certification.
- Use of high-strength composite, aluminium, stainless steel and rubber.
- Simple, flexible and robust thanks to in-house manufacturing and high quality standards.
- Patented ball system with shock and vibration isolation in three sizes.

### Flexibility & Technology

- Flexible RAM<sup>®</sup> Mounts System with more than 6,000 modular components.
- Reliable and sturdy connections thanks to ball and socket system with elastomeric coating.
- Adjustable to almost any position without additional tools.
- INTELLISKIN<sup>®</sup> - ertified according to MIL-STD-810G Drop Protection: for highly effective drop protection while maintaining operability.
- GDS<sup>®</sup>-Platform: protection, charging and data synchronisation functions combined in one device.

### Lifelong Guarantee & Support

- Resource and budget friendly thanks to optimal adaptability to different device versions.
- Reliable anti-theft protection through lock systems for holders and adapters.
- Sales support for customised projects and individual requirements.
- Lifelong guarantee on standard moulding articles.
- Three-year warranty on electronic devices and wear parts.
